

Neha Parepalli

nehaparepalli@gmail.com | +49 157 52567435 | Wuppertal, Germany | LinkedIn | GitHub
Indian Citizen | Eligible to Work in Germany | Born: 02.04.1999

SKILLS

Data Engineering: Python, SQL, PySpark, Databricks, Airflow, ETL/ELT, Data Modeling, DQ
Generative AI: LLMs, RAG, LangChain, Prompt Engineering, OpenAI APIs
Backend & Platform: FastAPI, Docker, REST APIs, GitHub Actions, CI/CD
Cloud & Analytics: Azure, Pandas, NumPy, Root Cause Analysis
Data Platforms: dbt, DuckDB, Structured Streaming, Parquet

PROFESSIONAL EXPERIENCE

ITERGO Informationstechnologie GmbH

Working Student | Generative AI

09/2025 – 03/2026

Düsseldorf, Germany

- Built **30+ GenAI workflows**, reducing manual processing effort by **85%**.
- Processed **80+ enterprise datasets**, improving AI output quality and traceability.
- Automated cross-team business processes, accelerating delivery cycles by **30%**.

ITERGO Informationstechnologie GmbH

AI Intern | Prompt Engineer

03/2025 – 08/2025

Düsseldorf, Germany

- Engineered prompts and datasets for **20+ AI use cases** across business functions.
- Optimized prompt pipelines, improving response consistency across repeated test runs.
- Designed automated testing workflows, reducing validation effort by **50%**.

Accenture Services Private Limited

Data Engineering Analyst | Client: Linde PLC, Germany

09/2021 – 08/2023

Mumbai, India

- Developed Python and SQL pipelines processing **1M+ records/month** for Linde PLC.
- Automated reporting workflows, reducing operational effort by **25%**.
- Improved data quality checks, decreasing processing errors across recurring pipelines.

PROJECTS

RCA Copilot – AI Incident Intelligence Platform

[GitHub]

- Built an AI RCA platform using **FastAPI, LangChain and LLMs** with **5 analysis agents**.
- Automated incident investigation workflows across logs, metrics and alerts.
- Generated structured root-cause reports using **RAG** and multi-source retrieval.

Document Intelligence Data Platform

[GitHub]

- Developed an OCR + **LLM** document intelligence pipeline for automated processing.
- Implemented extraction and validation workflows for structured data capture.
- Built scalable APIs and processing services using **FastAPI, Docker and Python**.

Clickstream Lakehouse Analytics Platform

[GitHub]

- Built **PySpark ETL** pipelines for clickstream ingestion and transformation.
- Developed **dimensional data models** supporting analytical workloads.
- Implemented monitoring and validation checks for **data quality**.

EDUCATION

Darmstadt University of Applied Sciences

M.Sc. Electrical Engineering & Information Technology

09/2023 – 03/2026

Darmstadt, Germany

St. Francis Institute of Technology

B.E. Electronics & Telecommunication Engineering | CGPA: 8.61/10

08/2017 – 06/2021

Mumbai, India

LANGUAGES

German (B1), English (C2), Telugu (Native), Hindi
