PROFILE

AI and Data Engineer with experience across enterprise Generative AI and data engineering environments. Focused on building reliable AI and data solutions, with hands-on project work in agentic AI, evidence-grounded systems, and production-oriented workflows.

SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, Data Modeling, ETL/ELT

Generative AI: Prompt Engineering, RAG, LLM Evaluation, Embeddings, FAISS

Agentic AI & Backend: LangGraph, FastAPI, REST APIs, Streamlit, Ollama

Data Engineering & Platforms: PySpark, Databricks, Airflow, dbt, DuckDB, PostgreSQL

DevOps & Observability: Docker, Git, GitHub Actions, CI/CD, Azure, OpenTelemetry, Grafana

PROFESSIONAL EXPERIENCE

ITERGO Informationstechnologie GmbH

09/2025 – 03/2026

Working Student | Generative AI

Düsseldorf, Germany

- Optimized prompts and supported AI workflows across **30+** enterprise Generative AI use cases.
- Evaluated LLM responses for correctness, clarity, consistency, and business relevance.
- Collaborated with cross-functional teams to refine requirements and improve AI solution quality.

ITERGO Informationstechnologie GmbH

03/2025 – 08/2025

Intern | Generative AI

Düsseldorf, Germany

- Prepared structured datasets supporting **20+** enterprise AI use cases and evaluations.
- Supported prompt testing, LLM validation, AI quality checks, and workflow experimentation.
- Automated testing and validation workflows, reducing manual evaluation effort by **50%**.

Accenture Services Private Limited

09/2021 – 08/2023

Data Engineering Analyst | Client: Linde PLC, Germany

Mumbai, India

- Developed Python and SQL ETL pipelines processing over **1M records per month**.
- Built data integration and reporting workflows supporting enterprise business applications.
- Implemented data quality and validation controls across large-scale ETL workflows.

PROJECTS

AgentOps Local – Evidence-Grounded AI Incident Investigation System

[GitHub]

- Built a local-first system for investigating real public service incidents from live evidence.
- Automated planning, evidence collection, grounded answers, validation, and investigation traces.
- Verified with **40 tests, 15/15 policy cases**, interface checks, and local deployment tests.

TruthLens AI – Evidence-Grounded LLM Verification System

[GitHub]

- Built a system that answers questions while showing which claims are supported by evidence.
- Decomposes questions, retrieves evidence, verifies claims, and checks relevance and coverage.
- Returns supported answers while flagging contradicted or insufficient-evidence claims.

EDUCATION

Darmstadt University of Applied Sciences

09/2023 – 03/2026

M.Sc. Electrical Engineering & Information Technology

Darmstadt, Germany

St. Francis Institute of Technology

08/2017 – 06/2021

B.E. Electronics & Telecommunication Engineering | CGPA: 8.61/10

Mumbai, India

LANGUAGES

German (B1), English (C2)
